Ericsson Estonia
Valukoja 8, 11415 Tallinn, Estonia

Dear Manager,

I am writing to express my sincere interest in the Software Developer Trainee position at Ericsson Estonia. With a background in computer science through my MSc in Software Engineering at the University of Tartu & Tallinn University of Technology, I am eager to contribute my skills and passion for software development to Ericsson's innovative team.

Ericsson's global reputation as a leader in communications technology aligns perfectly with my ambition to contribute to connectivity and digitalization projects. My academic and independent software development experiences have equipped me with proficiency in programming languages such as C#, Python, and Java, matching the technical requirements of the role. Projects like the IoT-Based Health Monitoring System and the Estonian Translate and TTS Mobile App have honed my abilities in data visualization, IoT solutions, and application development.

Working on collaborative projects has not only enhanced my technical skills but also fostered a proactive attitude and a drive for continuous learning. I am particularly drawn to Ericsson's commitment to pushing boundaries and its supportive environment for talent development. The opportunity to work alongside experienced professionals and contribute to groundbreaking technologies in digitalization, application development, and data analytics is exciting to me.

I look forward to the opportunity to further discuss my application. Thank you for considering my candidacy.

Warm regards,
Xinjian Zhang
